

How the Monoloci App assists your Tour/Activity business

Monoloci is designed to enhance exploration and travel by combining essential safety tools with innovative ways to plan trips, connect with groups, and discover the natural beauty, attractions, food, and drink venues of a region—all within one user-friendly app.

Directory

As a **tour/activity provider**, the Monoloci app allows users to easily discover your services, make bookings and enhances your tour/activity before and during the event.

The **Directory** is ideal for providers running tours or group activities. You select which state your profile displays in (can be multiple states), brand information to be displayed, images for attention and the link to your about us web page.

We scrape your site for tours and activities or you can provide the appropriate page containing your offerings (better). We have a dedicated modal for displaying your available tours/activities. These listings contain basic information and a link direct to your booking page.

We provide a directory to present your business and events to prospective tourists looking for adventure. No commissions, just a professional branded profile guiding visitors direct to your own booking site.

Activity Portal

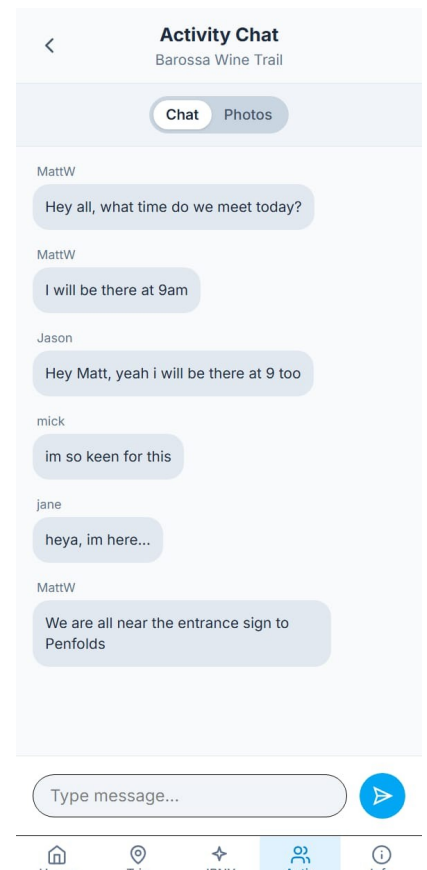

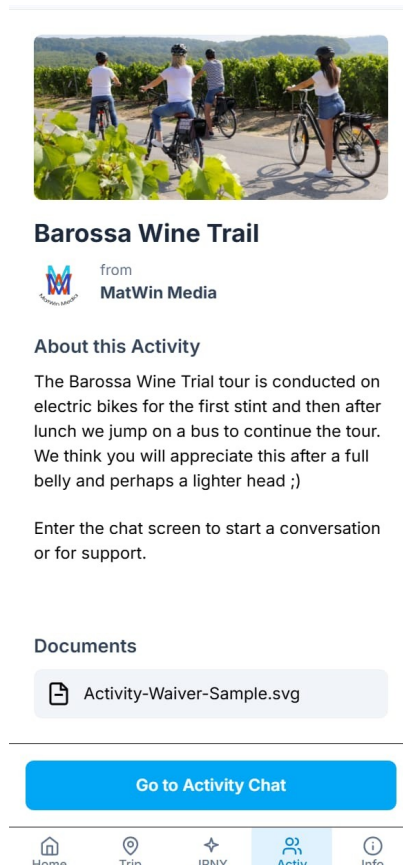

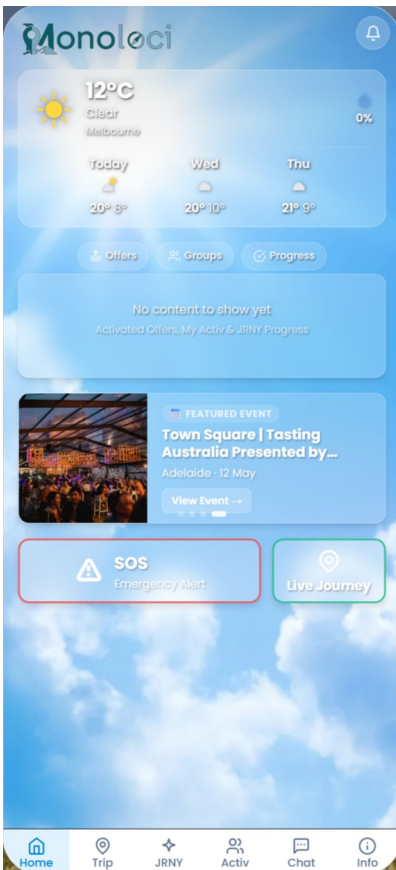

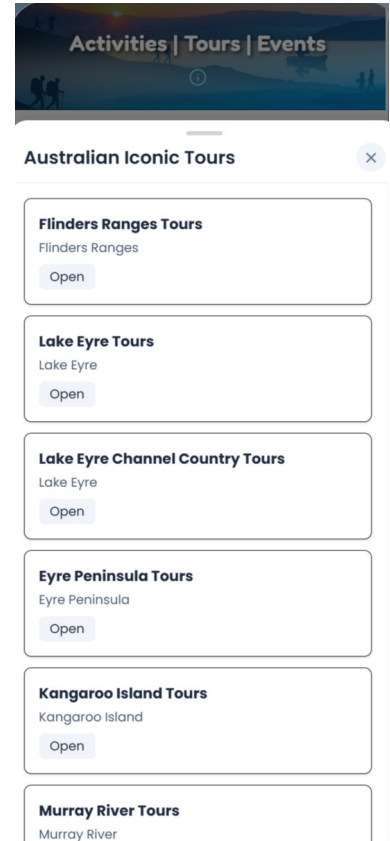

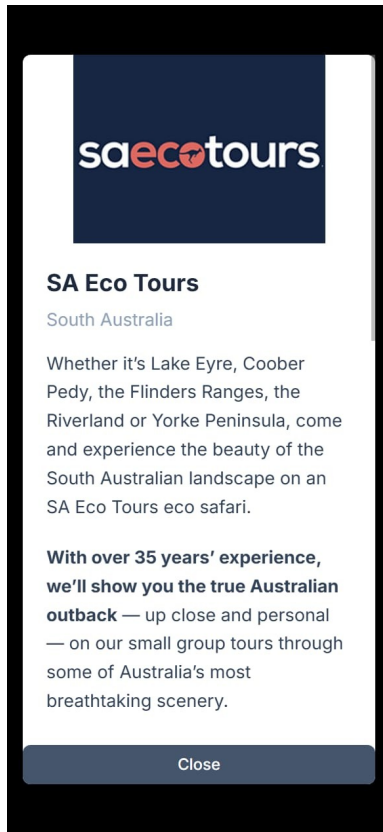

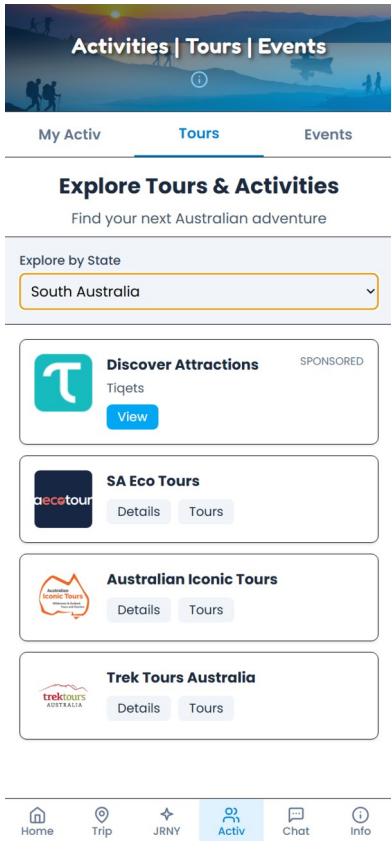

When you list in the Directory, you can generate a unique **Activity Code** for each event you choose. Guests can enter this code in the app to unlock a private activity portal just for your event:

- A branded screen dedicated to your event
- Important documents and details required before the event (waivers etc)
- A private group chat and photo-sharing space (great for boosting group dynamics and support) Often 1 group member gets that photo everyone else wants!
- Unlike other group chat platforms (such as WhatsApp), Monoloci does not require phone numbers (or any other personal information) allowing users to communicate in groups without having to disclose their private information to strangers.

This creates a seamless way for your guests and your business to communicate, share experiences, and build community.

Through our **back-end portal**, you manage activity details and generate codes easily.

Safety

Monoloci is a safety-first app which is perfect for a tour/activity business like yours. We offer peace of mind, security and prompt assistance if and when an emergency presents. A prominent **SOS button** is located on the home screen that can be easily activated when needed. Once set up, the SOS button has the option to call 000 or send a per-configured text message with current GPS location to a nominated contact (created in the settings screen). When in an emergency, less friction can save valuable seconds to enhance an efficient emergency response.

The nominated contact could be setup to be the tour guides mobile number for local/group assistance. These safety features offer an enhanced safety reputation for your businesses tours.

Analytics

We offer comprehensive analytics so you can track how many users; Viewed your profile, Clicked on a Tour/Activity, plus more...

Join us as a Monoloci Foundation Partner

Sign up: monoloci.xyz/partners

Select **Directory** (and activity portal if desired to enable the private group chat etc)
